

Info Sheet for Technical description

No. 0012

Organization

* Mandatory fields

Name of Organization*	SAROUTE Co., Ltd.		
Address, City, States, Zip, Country*	1-21-4 Takadanobaba, Shinjuku-ku, Tokyo, 169-0075, Japan		
URL	https://www.bio-logi.com/en/		
Brief Descriptions of Organization* (Approx. 100 words)	We provide Logistics services for temperature-controlled sensitive medical products and materials such as Bio samples, IPs, Cells, and Specialty drugs, including Biological products, cell therapy products, and tissue-engineered products. Patient home and Hospital delivery/collection are feasible using our "First and Last Mile" network in Japan.		
Contact address	Name*	Kazumi Abe	
	Department* / Position	Life Science Innovation Div. / General Manager	
	E-mail* / TEL	kabe@saroute.co.jp / +81-3-5285-5039	

What kind of technology do you want to offer? *

- ☐ **A.** Clinical Development Pipelines
- ☒ **B.** Regenerative Medicine-related Consumables / Instruments / Materials / CDMO Services etc.
- ☐ **C.** Platform Technologies(*) that are not included in the above (Group B)

→ Please see **Sheet [A]**→ Please see **Sheet [B]**→ Please see **Sheet [C]**

* Peripheral technologies that contribute to a significant improvement in productivity throughout the value chain of pharmaceuticals, from research and development to manufacturing and ultimately market launch.

If you agree to the following, please check "Yes" below. *

The technologies introduced in this 'Info Sheet' are in the public domain, as they have been published in research papers or have related patent applications.

- ☒ Yes

Do you have any collaborations/partnerships with pharmaceutical companies?

- ☐ Yes
- ☐ No

If you have already received funding from VCs or other sources, up to which stage has the investment round progressed?

- ☐ Angel / Seed (including AMED/JST grants)
- ☐ Series A
- ☐ Series B
- ☐ Series C
- ☐ Series D or further advanced stages

Do you agree to leave your presentation materials at FIRM hands and entrust us to make use of them for the purpose of promoting your partnering opportunities? *

Options*	Comments
☒ Yes	
☐ No

| ☐ Cells | ☐ Culture medium | ☐ Reagents |
| ☐ Cell banking | ☐ Storage / Container | ☒ Logistics |
| ☐ Cell / Viral vector manufacturing technology | | |

Description*

We provide logistics services tailored to your needs and support your challenges in the field of Cell/Gene Therapy and Regenerative Medicine in Japan.

- Logistics Design in Clinical Trials for supporting your planning

We support clinical trial logistics of cell therapy products and regenerative medicines through the following services. Transportation route verification/ Design and procurement of temperature control containers/ Establishment of transportation procedures/ Schedule adjustment for delivery date and time

- Express Service for Cells for ensuring the process after transportation

Expedited transportation is often necessary to ensure the cell culture process proceeds smoothly after transport. We support you through our logistics networks and trained personnel that can be dispatched within 12 hours between facilities in Japan.

- Cryogenic Supply Chain Solutions for minimizing the influence of temperature fluctuation on product quality

Provided by a single point of contact, our services include cryogenic storage with the GMP-compliant depot, shipping preparation of Dry Shippers, transportation, and Dry Shipper return management.
